

## **Business Investment Opportunity RAVE – Worlds' Fastest Production Sailboat**

Would you like to own the worlds' fastest production sailboat company?

The RAVE hydrofoil trimaran sailboat has been out of production for 8 years, but WindRider still receives daily inquiries from prospective buyers. With speeds in excess of 35 knots, who isn't intrigued when they see videos like this?

<http://www.youtube.com/watch?v=CRTBYyNsmic>

There have been about a quarter million views of various RAVE videos. The growth of multihulls, the pervasive images of the Oracle/BMW vessel winning the America's Cup, and general love of speed all contribute to the intense interest in the RAVE.

WindRider International owns the mold and prints for the RAVE but does not have the resources to get the RAVE into the market again. In addition, its' speed and sophistication don't fit with the WindRider brand, which is represented by "Sailing Simplified". **Producing the RAVE in carbon fiber, for which a business plan exists, would further enhance performance and exclusivity.**

But WindRider could still be associated with the RAVE (manufacturing and marketing) and hopes to find a partner able to "take the ball and run". An ideal investor would be a Corporation which would benefit by having

- 1) its name associated with the fastest production solo sailboat in the world
- 2) YouTube videos and other print media exposure worldwide – of course with the company name on the boat/sail and
- 3) an existing market of potential buyers
- 4) replacement parts business for 136 RAVE sailboats originally sold

If you would like to talk further about the opportunity to be the owner of the fastest production sailboat company in the world, please email or call.
